GREAT MINDS PLAY ALIKE

## THE MIM GAMES

Through competitive challenges that foster community engagement, school spirit and collaboration, the MIM Games perfectly embody two main aspects that IE Business School has embraced as central tenets of its teaching philosophy:

### 1. Entrepreneurship

### 2. Teamwork

Teams comprised of students from across all sections (English and Spanish) will compete against each other to win points through successful participation in several events. These events will provide additional opportunities to network both within and across groups and will involve various types of competitions, ranging from a sport tournament to a talent competition, to allow members of the entire Master program the opportunity to showcase various skills and talents that they may not be able to display in the classroom, such as athleticism and artistic creativity.

IE Business School was founded with an aim to foster the business leaders of tomorrow, with a focus on building an entrepreneurial spirit and an understanding of the global business environment. To this end, the MIM Games seek to foster creative and entrepreneurial thinking, team building and opportunities for networking between students.

**269 STUDENTS**

Participated in the last edition  
of MIM GAMES
