# Introduction

At IE University, the mission of our IE Talent and Careers team is to enhance and secure student success. By staying on top of the latest industry trends and insights, our career services help both students and alumni find their place in the professional world.

Each year, we take great pride in showcasing the professional accomplishments of our Master in Computer Science and Business Technology students. This year is no exception, as we share insights on the various career paths of our 2020 graduates. Against a challenging economic backdrop, our global recruiting outreach has proven effective at providing opportunities for candidates with extensive skills in tech and data. Combined with a wider business understanding, their holistic education has prepared them for maximum impact.

The advances in today's technological landscape have transformed how business is carried out and will have a huge impact on their continued market control. With data and artificial intelligence having become key factors in both day-to-day and strategic operations, individuals who possess these skills are in high demand.

This is why Computer Science and Business Technology students are crucial assets in continued business success. Their ability to build or develop the tech of tomorrow, while also being aware of the broader business aspects, allows companies to confidently move forward and secure their positions as key market players.

A high percentage of our students have found jobs, with more than 87% of them working within six months of graduating. Of the employed students, 50% went on to work in technology companies, with McKinsey & Co and AWS among the top recruiters. What's more, with entrepreneurship being one of IE University's main values, many of our students have gone on to start their own companies after finishing their program.

These graduates follow in the footsteps of those who make up IE University's impressive global network of over 65,000 alumni. Based in more than 100 countries around the globe, our alumni hold high-level positions in varying industries and leading organizations within the public, private and non-profit sector.

**This program not only provided me with insightful information about the technologies that would fuel future progress, but it also enabled me to create a nexus between the technical and business worlds. In addition, I was able to expose myself to a network of highly capable leaders who boosted my technical and personal growth. From the master's program one of my takeaways is that AI and IoT can only achieve their full potential, if used with purpose. Which is why it is critical to know and appreciate emerging market patterns in order to lead tomorrow's innovative businesses, all of which IE assisted me with.**
